AI Policy Manager — POC Multi-Layer Intelligence Architecture

Entry points › Data plane › Specialist LLMs › Domain MCPs › Master Orchestrator MCP › Outputs

Centralize standards
Hub defines once

Distribute execution
Spokes build locally

Shared LLM / MCP
Common model layer

Domain autonomy
Spokes own use cases

Continuous feedback
Prod signals → Hub

Governed innovation
Experiment within rails

AI Policy Manager — Enterprise Reference Architecture

Adds: EventBridge real-time detection · full storage stack · OPA/Cedar enforcement gate · stateless Master MCP · HITL/CAB gate · remediation feedback loop
